

De-Materialization Chamber

This original idea is a new twist on the blue room effect. Only one way in and out, and examinable. The chamber may be built to suit the venue, fun effects may be added. Many possibilities.

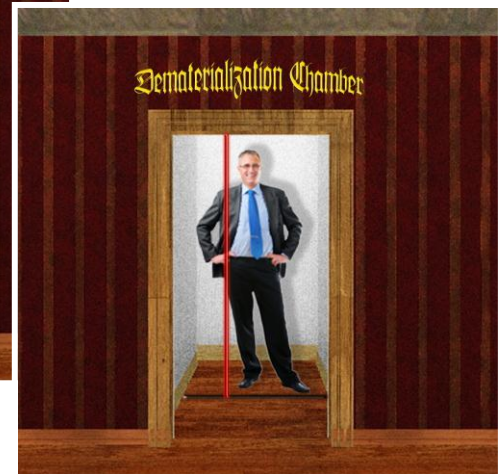

Empty chamber, door open

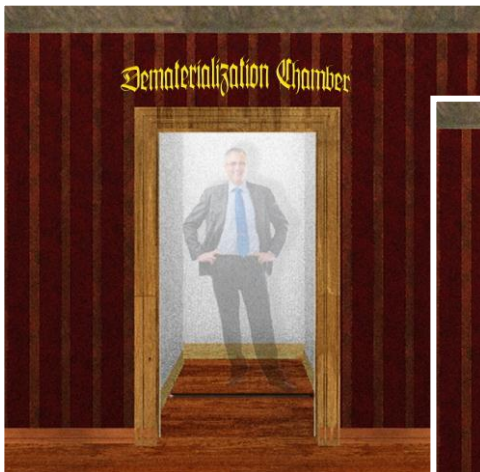

Performer enters, sliding glass door closes automatically

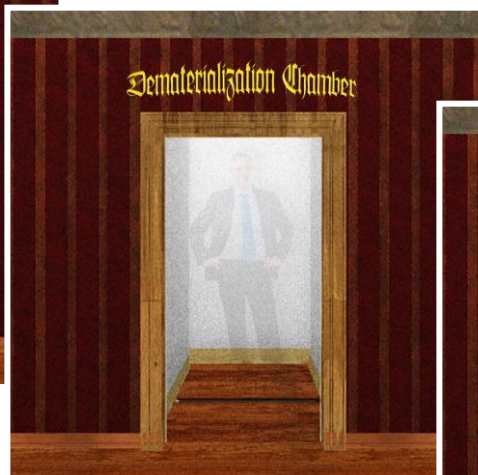

Red scanner beam scans the performer as it travels across

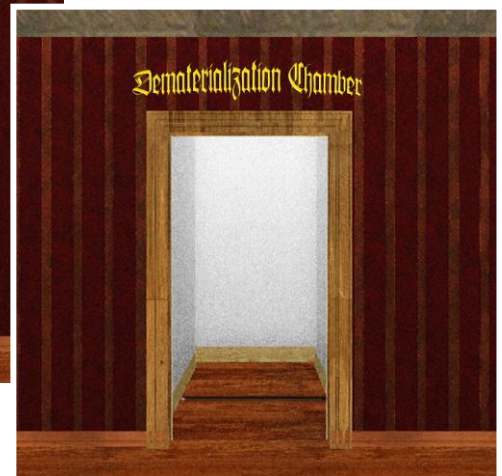

Seconds later, the performer begins to visually fade away

Performer then becomes completely invisible

Glass door opens and the chamber may be fully examined

The performer may suddenly re-appear standing behind their guests immediately after vanishing. Imagine their surprise when tapped on the shoulder seconds later! This may also be performed with a guest rather than the performer or staff member. *Pricing upon request (dependent on features, style ,etc.)*
